

Stablecoin native banking and payments

Easner connects businesses across the Global South and Global North to the US dollar through stablecoin native banking. Built on blockchain, our platform unifies accounts, collections, and global payouts, reducing the need for separate financial workflows in each market.

US dollar access

For businesses operating globally

80+ payout destinations

Pay suppliers, teams, and partners

Built for individuals, international businesses, global employers, marketplaces, payroll platforms, and fintechs.

Business banking and payments

Hold USD, EUR, and GBP balances. Collect revenue with Invoicing, Checkout, and Payment Links, including invoices payable in supported stablecoins. Pay suppliers and run Payroll for employees and contractors, with recurring payment workflows, team access, approvals, and payment records in one dashboard.

Infrastructure for partners

Use Easner directly for business banking, embed accounts and payments in your software, or launch a branded payment experience. APIs connect verification, collections, payouts, and webhooks, supported by commercial onboarding and operational support.

Personal banking

Hold USD, EUR, and GBP balances, receive payments, and send money worldwide. Manage everyday finances through the Easner app or on desktop.

Blockchain at the core

Blockchain and stablecoins power Easner. Send and receive supported stablecoins directly, or use familiar account and payment flows. Stablecoin settlement connects US, EU, and UK payment infrastructure to local payouts worldwide.

Discuss your payment flows and partnership opportunities

Easner is a financial technology company, not a bank. Banking and payment services are provided by licensed partners. Account and product availability depend on verification, jurisdiction, approval, and partner rules. Payout coverage does not determine account eligibility.
