

Personal and business banking across borders

Easner brings everyday finances and global payments together. Individuals can manage money at home and abroad, businesses can collect revenue and pay their teams, and partners can build financial products on the same platform.

ACCOUNT BALANCE CURRENCIES

Personal banking

Hold multiple currencies, receive payments, and send money to people and businesses in the US and around the world. Manage everyday finances through the Easner app or on desktop.

Global payments made practical

Easner connects US, EU, and UK payment infrastructure to local payouts worldwide. Stablecoin settlement runs behind the scenes, so customers can send dollars and recipients receive local currency without managing a crypto wallet.

Business banking and payments

Bring accounts, collections, and payouts into one dashboard. Get paid through Invoicing, Checkout, and Payment Links. Pay suppliers, employees, and contractors, with team access, approvals, and payment records.

Infrastructure for partners

Launch branded financial programs or embed accounts and payments through Easner APIs. Build with verification, collections, payouts, and webhooks, supported by commercial onboarding and operational support.

Easner is a financial technology company, not a bank. Banking and payment services are provided by licensed partners. Account and product availability depend on verification, jurisdiction, approval, and partner rules. Payout coverage does not determine account eligibility. Fees and exchange rates are shown before transfer confirmation; payment timing varies.
